RACQ

Dear

Thank you for inviting the Australian Greens to respond to the RACQ's Federal Election Priorities. The Greens believe that our Queensland cities and communities should be thriving, equitable, and resilient - places where clean air, green spaces, transport and affordable housing are accessible to all.

Our policies include:

- Deliver cheaper insurance during a climate crisis
- Electrify homes and businesses to reduce emissions and bring down energy bills
- Roll out a national EV charger network
- 100% renewable energy by 2030 by expanding the Capacity Investment Scheme and launching FutureGrid to fix grid congestion and support EV charging
- Provide financial assistance for first-time buyers of EVs, with grants of up to \$10,000
- Establish a new Sustainable Cities Agency to set national standards for sustainable urban development, supported by \$40 billion in federal funding over 10 years

You can read more about our policies to protect the climate and environment on our website:
<https://greens.org.au/platform>

Thanks again for getting in touch and we look forward to working with you and your members in the next term of Parliament to implement critical climate and environmental protections to safeguard our future.

Yours sincerely,

Senator Larissa Waters

Greens Senator for Queensland
